		06/27/2008		PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 09/893,997	Applicant(s) JORGENSEN ET AL.
	Examiner HUYEN D. LE	Art Unit 2615

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If no period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(o).

Status

- 1) Responsive to communication(s) filed on 28 March 2008.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1,3,4,6,8-10,12,14-28 and 34-45 is/are pending in the application.
 4a) Of the above claim(s) 14-16,18-28,30-33 and 35 is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1,3,4,6,8-10,12,17,34 and 36-45 is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) 14-16,18-28 and 35 are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) Notice of References Cited (PTO-892)
 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
 3) Information Disclosure Statement(s) (PTO/SB/08)
 Paper No(s)/Mail Date _____
- 4) Interview Summary (PTO-413)
 Paper No(s)/Mail Date _____
- 5) Notice of Informal Patent Application
 6) Other: _____

DETAILED ACTION

Claim Rejections - 35 USC § 102

I. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 3, 4, 6, 8-10, 12, 17, 34, 36-39, and 41-45 are rejected under 35 U.S.C. 102(e) as being anticipated by Darbut et al. (U.S. patent U.S. patent 6,597,793).

Regarding claims 1, 8, 10, 17, 34, 43 and 45, Darbut teaches a microphone assembly (10) comprising a casing for mounting in an electronic communication device (col. 1, lines 7-10). As shown in figures 1-3, the microphone assembly comprises one or more sound inlet ports (18, 19, 20, 21, 30, 32, 54, 56, 58), one or more microphones (26) and one or more controlling devices (15) that can be operated by a user for selectively controlling the operation of the assembly. The inlet ports (18, 19, 20, 21, 30, 32, 54, 56, 58), the microphone (26) and the controlling device (15) are combined to form an integrated part of the microphone assembly (see figure 3, the Applicant should also note the definition of the term “integrated” from the Webster’s II New Riverside University Dictionary).

Darbut further shows the controlling device (15) that forms part of the inlet ports (figures 1, 3, 4), and the controlling device (15) that is a turning knob (figure 1).

As shown in figures 1, 3 and 4, the controlling device includes channels (54, 56, 58) for allowing sound to pass through sound inlet port to the microphone housing, and the controlling device (15) includes an actuator having a generally rounded outer configuration.

Regarding claim 3, Darbut teaches the microphone that comprises a directional microphone having a sound inlet spout connected to sound inlet port as claimed (figure 3, col. 4, lines 25-40).

Regarding claim 4, Darbut teaches the microphone that comprises an omni-directional microphone having a sound inlet spout connected to sound inlet port as claimed (figure 3, col. 4, lines 25-40).

Regarding claim 6, as broadly claimed, each sound inlet port (15, 18, 19, 20, 21, 30, 32, 54, 56, 58) comprises controlling devices (14, 15, 16, 60, 62, 64).

Regarding claim 9, as broadly claimed, it is inherent that the operations of the Darbut hearing aid comprises powering down or activate the device (on/off switch).

Regarding claim 12, as broadly claimed, the controlling device (15) is adapted to switch between an on-state and off-state of the directional or omni-directional microphone (col. 4, lines 28-40).

Regarding claim 36, Darbut teaches a microphone assembly (figures 1, 2) for mounting in an electronic communication device (col. 1, lines 7-10). The microphone assembly (figures 1, 2) comprises a microphone housing (26 or 12), and a sound inlet port (15, 18, 19, 20, 21, 30, 32, 54, 56, 58) for passing sound to the microphone housing (26 or 12). As shown in figures 1, 3 and 4, the sound inlet port includes a controlling device (15, 54, 56, 58, 60) forming at least part

Art Unit: 2615

of the sound inlet port, and the controlling device (15) is operable by a user for selectively controlling operation of the microphone assembly.

Regarding claim 37, as broadly claimed, the controlling device (54, 56, 58, 60) is disposed at least partly within the sound inlet port (15 in figure 4 or 18, 19, 20 and 21 in figures 1, 3).

Regarding claim 38, Darbut shows the controlling device that includes a first part (15) and a second part (12) as claimed.

Regarding claims 39 and 41, Darbut shows the first part of the controlling device that includes channels (54, 56, 58) as claimed.

Regarding claim 42, Darbut teaches the microphone housing (12, figure 2) that includes an outer surface (22) and an inlet (18, 19, 20, 21) formed in the outer surface. As shown in figures 1 and 3, the sound inlet port (54, 56, 58) is disposed adjacent the outer surface of the microphone housing generally over the inlet for passing sound to the microphone housing as claimed.

Regarding claim 44, and the controlling device (15) includes a user operable actuator having a generally rounded outer configuration as claimed.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 9 and 40 rejected under 35 U.S.C. 103(a) as being unpatentable over Darbut et al. (U.S. patent 6,597,793).

Regarding claim 9, as interpreted in a different manner, Darbut does not specifically teach the operations of the Darbut hearing aid device that comprises powering the device down and/or activating the device. However, the examiner takes the Office Notice that providing an on/off for the switch in a hearing aid device is well-known in the art.

Therefore, it would have been obvious to one skilled in the art to provide an on/off switch in the hearing aid of Darbut for powering or activating the device.

Regarding claim 40, Darbut does not specifically teach the controlling device (15) that is a push button as claimed. However, it would have been obvious to one skilled in the art to provide any type of switch for the switching mechanism (15) of Darbut such a push button for alternate choice and better adjusting and operating the device.

Response to Arguments

5. Applicant's arguments with respect to claims 1, 3, 4, 6, 8-10, 12, 17, 34 and 36-45 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HUYEN D. LE whose telephone number is (571) 272-7502. The examiner can normally be reached on 9:30AM-6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, SINH TRAN can be reached on (571) 272-7564. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
